shahinmohammed698@gmail.com | +91-7010850373 | [linkedin](#) | [github](#)

## Professional Summary

---

Full Stack Developer pursuing B.E. in Computer Science Engineering with hands-on experience in building scalable web applications using React.js, Node.js, Express.js, and PostgreSQL. Skilled in designing RESTful APIs, implementing JWT authentication, and solving real-world problems using Data Structures and Algorithms. Strong analytical and problem-solving abilities with the adaptability to thrive in fast-paced startup environments.

## Technical Skills

---

- Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3
- Frontend: React.js, Next.js, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Databases: PostgreSQL, MongoDB, MySQL
- Cloud & DevOps: AWS, Docker, Linux, Git, GitHub
- Concepts: Data Structures, Algorithms, OOP, SDLC, Problem Solving

## Internship Experience

---

### Full Stack Web Development Intern

Mar 2026

Prodigy InfoTech

- Developed 3+ MERN applications and implemented REST APIs, improving application performance by 25%.
- Optimized database operations and debugging workflows, reducing development issues and improving code quality.

### MERN Stack Developer Intern (Virtual)

Apr 2026 – Jun 2026

- Built responsive React.js components and integrated 3+ backend APIs, improving application usability.
- Developed Node.js and Express.js modules while utilizing Git workflows to improve code maintainability.

## Projects

---

### StudyorBlock – AI-Powered Academic Productivity Platform

React.js, Node.js, Express.js, PostgreSQL, JWT, Tailwind CSS

- Reduced manual assignment tracking by 60% by developing a full-stack academic platform for task submission and approval workflows.
- Improved student productivity through JWT authentication, role-based dashboards, and automated task management.
- Designed scalable REST APIs and optimized database operations supporting secure task management for 100+ users.

### Continuous Authentication System with Behavioral Trust Bubble

- Improved authentication reliability through continuous user verification using behavioral analysis techniques.
- Reduced dependency on traditional login mechanisms by implementing real-time trust-based validation.
- Built secure APIs and behavioral monitoring modules that enhanced authentication accuracy.

### AgriSmart – AI-Driven Agriculture Platform

React.js, TypeScript, Express.js, MongoDB, Google Gemini AI

- Built a full-stack AI-driven agriculture platform independently, integrating Google Gemini AI for crop disease detection and a real-time chatbot.
- Implemented real-time sensor analytics and weather integration to support data-driven farming decisions.
- Designed a MongoDB-backed backend with secure REST APIs, handling image analysis and automated report generation.

## Certifications & Achievements

---

- Google Cloud Certification
- DataCamp Certification – SQL
- Revamp Academy – MERN Stack Development
- HackerRank Java Skill Certification
- NPTEL – Programming in Java (ELITE + SILVER)
- LeetCode Knight Badge
- Tier 1 Recognition – GDG Study Jam (Google Cloud Platform, Gemini AI, Firebase)
- Top 10 Finalist – TechSprint Hackathon

## Education

---

### Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

Nandha College of Technology, India — CGPA: 7.6 / 10

### Higher Secondary (12th Grade)

S.V.N Matric.Hr.Sec.School — 12th Grade: 68%
