PROFESSIONAL SUMMARY

Computer Science Engineering student who enjoys turning ideas into working web products, from the interface to the API and the database. Has built projects that use AI to solve practical problems, and tracks bugs down to the root cause instead of patching symptoms. Looking for a team where ownership, steady learning, and good engineering matter.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Web Development: MERN

Databases: MySQL, MongoDB

AI Integration: LLM API Integration, Prompt Engineering

Cloud & Tools: AWS (Basic), Docker (Basic), Git, GitHub

Concepts: Networking

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern (Virtual) – Prodigy InfoTech

Mar 2026

- Built MERN applications end to end, connecting React.js interfaces to Express.js REST APIs backed by MongoDB and MySQL.
- Integrated LLM APIs into web workflows and applied prompt engineering to produce consistent, structured AI responses.
- Traced and fixed API and database issues methodically, improving query logic and overall code reliability.

MERN Stack Developer Intern (Virtual) – Revamp Academy

Apr 2026 – Jun 2026

- Developed responsive React.js components and wired them to Node.js and Express.js modules through REST APIs.
- Modeled relational data and wrote MySQL queries that powered API endpoints; used Git workflows for clean collaboration.
- Prototyped AI-assisted features using LLM integration and prompt design within the MERN stack.

PROJECTS

AgriSmart – AI-Driven Agriculture Platform

[React.js, TypeScript, Express.js, Mongo DB, Google Gemini AI]

- Built a full-stack AI-driven agriculture platform independently, integrating Google Gemini AI for crop disease detection and a real-time chatbot.
- Implemented real-time sensor analytics and weather integration to support data-driven farming decisions.
- Designed a MongoDB-backed backend with secure REST APIs, handling image analysis and automated report generation.

StudyorBlock – AI-Powered Academic Productivity Platform

[React.js, Node.js, Express.js, PostgreSQL, JWT, Tailwind CSS]

- Reduced manual assignment tracking by 60% by developing a full-stack academic platform for task submission and approval workflows.
- Improved student productivity through JWT authentication, role-based dashboards, and automated task management.
- Designed scalable REST APIs and optimized database operations supporting secure task management for 100+ users.

Continuous Authentication System with Behavioral Trust Bubble

[React.js, JavaScript, Tailwind CSS, Python, Flask, REST API, JWT, PostgreSQL, Scikit-learn, NumPy, SciPy]

- Improved authentication reliability through continuous user verification using behavioral analysis techniques.
- Reduced dependency on traditional login mechanisms by implementing real-time trust-based validation.
- Built secure APIs and behavioral monitoring modules that enhanced authentication accuracy.

CERTIFICATIONS

- NPTEL – Programming in Java (Silver + Elite):** Scored in the Elite + Silver category in the proctored exam on core Java and OOP.
- Revamp Academy – MERN Stack Training Certificate:** Hands-on training in building full stack apps with MongoDB, Express, React, and Node.
- DataCamp – SQL Certificate:** Covers querying, joins, aggregation, and data analysis with SQL.
- Google Arcade Certificate:** Completed hands-on Google Cloud labs and skill badges.
- HackerRank – MongoDB Certificate:** Verified proficiency in MongoDB queries and data handling.

ACHIEVEMENTS

- Tier 1 Recognition – GDG Study Jam (Google Cloud Platform, Gemini AI, Firebase):** Recognized for completing the advanced learning tracks.
- Top 5 Finalist – TechSprint Hackathon:** Shortlisted among the top teams for a working, demonstrated solution.
- LeetCode Knight Badge:** Recognized for consistent, strong performance in coding contests.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

Nandha College of Technology, India | CGPA: 7.6 / 10

Higher Secondary (12th Grade): S.V.N Matric. Hr. Sec. School | 68%

2023
